

Customer Press Release – Product Advancement – August 2021

Legionella Specialties, LLC based in Salt Lake City, Utah is pleased to announce the upgrading of our highly successful Legionella Treatment Program. Our clients in the Hospital, Extended Care, VA Hospitals, Commercial Market, and others now have the opportunity to experience the state of art and thoroughly certified BX-9465 (second generation of our current product line).

Our Full Service Company now offers BX-9465. This upgrade includes:

- **EPA** Product Certification (Reg.No. 92945-1-94211).
- **NSF** 61 Approval for Drinking Water Systems.
- USA **FDA** affirmed **GRAS** Certification: An environmentally safe product.
- Non-Corrosive when used as recommended.
- De-Scaler for facilities with organic scale deposits.
- Works faster and more effectively than chlorine dioxide or monochloramine.
- Economically the most attractive treatment product on the market.

Additional Offerings From Our Company

- ❖ Water Management Programs using CDC Guidelines.
- ❖ Water Quality Testing of Medical Facilities and Commercial Buildings.
- ❖ On-Site PCR Testing for Legionella (results in less than one hour).
- ❖ Highly Efficient Remediation of Legionella Using Safe Techniques.
- ❖ Economical & Safe (non-corrosive) Solutions for Day to Day Facility Care.
- ❖ Comprehensive Training (Classroom Type) for Facility Operators.
- ❖ Client Portal for Information About Your Legionella Treatment Program.
